

There are three credit limits in the system.

FS-01-05 Field 14 (CREDIT LIMIT)	Default Credit Limit
FS-01-05 Field 24 (ELEM. CR LMT)	Elementary Credit Limit
FS-01-03 Field 12 (CREDIT LIMIT)	Campus Credit Limit.

The credit limit is selected in the order specified above. The following is how the program selects which credit limit to use for a student:

1. The Default Credit Limit (FS-01-05 Field 14) is selected.
2. If a student's campus type (FS-01-03 Field 4) is type E AND if the Elementary Credit Limit (FS-01-05 Field 24) is not zero, then it will be selected.
3. The Campus number for the student (FS-01-01 Field 5) is used to read the campus file and if the Campus Credit Limit (FS-01-03 Field 12) is set to Y, then the Campus Credit Limit will be selected.
